TIME: Thursday, March 26TH @ 7PM
PLACE: 78TH Precinct, 4TH Floor

The Move NY Fair Plan is a comprehensive proposal that addresses the health of New York City’s transportation system. It aims to reduce traffic congestion and fund transportation and transit improvements. Please join Campaign Coordinator and Analyst Jonathan Matz to discuss the regional and local implications of the plan.

The plans include:

• Revenue dedicated to road and bridge infrastructure; modernizing subways, expanding Select Bus Service/Bus Rapid Transit lines, lowering fairs and increasing service on intra-city commuter rail and Express Buses, and bringing the transit network to currently underserved neighborhoods through Major Transit Capital projects.

• 5-10% Reduced congestion in neighborhoods surrounding the Manhattan Central Business District (CBD) and 15-20% reduced congestion in the CBD.

• "Toll Swap": a reduction in tolls for MTA’s major outlying bridges including the Triborough, Whitestone, Throgs Neck and Verrazano Narrows, in exchange for E-Z Pass/Pay by mail electronic tolls for four East River Bridges and across 60th Street (with special provisions for taxis and commercial vehicles).
